Debut Author

Book Release in February 2021

## ***"The Possibilities are Endless"***

The day it happened was August 4, 2013. My son, Brad, fell victim to an arteriovenous malformation, also known as an AVM of the brain. In the autumn of that same year, Brad awakened from the induced coma following surgery to a diagnosis of a major stroke. One surgeon told us that we should just take Brad home and try to get him as well as possible, knowing his chances of recovery were slim to none. The family unanimously agreed that Brad would never want us to surrender. For months thereafter, he dealt with all kinds of surgery and rehabilitation with incredibly talented doctors and therapists.

As Brad's mother, I still can't imagine what others thought when they saw our family suffer, yet fight on. What came of that experience is "The Possibilities Are Endless," a memoir of our family's experience with tragic overtones but incredible success.

I am a first-time author who felt compelled to write this book and share my experience of facing a parent's worst nightmare. My family and I managed to overcome a virtual death sentence to welcome home a healthy fully functional man. The book will inspire the reader and those who are facing what appear to be insurmountable issues of any kind. My hope is to show readers a path to move forward and thrive again.
